Discussions | Showcases

Lab & solutions

Resources | IoT workspaces

Platform content

Blog | Pricing | Organizations

How to use this guide

Each section lists assets and copy your team must supply before publishing on UjuziLab. Required items [R] block publish or degrade learner experience. Optional items [O] improve discovery and engagement. Roles: Instructors create courses; Admins manage kits, programs, competitions, organizations, and site content.

Legend

[R] Required - must supply before publish or core experience breaks

[O] Optional - improves discovery, engagement, or polish

Contents

1. Global media & brand standards
2. Courses (Instructor > 6-step builder)
3. Lesson types (per lesson in curriculum)
4. Learning kits (Admin > /admin/kits)
5. Programs & bootcamps (Admin > /admin/programs)
6. Competitions (Admin > /admin/competitions)
7. Organizations (Admin > /admin/organizations)
8. Community & discussions
9. Learner projects showcase (/dashboard/projects/new)
10. IoT solutions workspace (Admin > Content > Solutions)
11. Lab resources (/lab-resources, Admin > Content)
12. Blog & marketing content (Admin > Content)
13. Pricing plans (Admin > Content > Pricing)
14. User profiles & onboarding
15. Admin publishing checklist

1. Global media & brand standards

Use consistent visuals across all sections. Upload via admin or instructor forms (stored under /uploads/).

- [R] Course / kit / program thumbnails - 16:10 ratio, min 800x500 px, JPEG/PNG/WebP, max 10 MB
- [R] Hero & catalog images - high contrast, diverse African makers/students, no watermarks
- [O] Organization logo - square or horizontal PNG/SVG, min 256 px, transparent background preferred
- [O] Instructor avatar - square, min 200x200 px
- [R] Videos - MP4/WebM upload (max 500 MB) OR YouTube/Vimeo embed URL
- [O] Certificate PDF template - A4 landscape with AcroForm fields: student_name, course_title, instructor_name, issue_date, verify_code, duration_hours

2. Courses (Instructor > 6-step builder)

Path: /instructor/courses/new > edit. Submit for admin review > publish. Minimum: title, 1 module, 1 lesson.

- [R] Step 1 - Basic info: title*, subtitle, description, category, level (Beginner/Intermediate/Advanced), language, thumbnail
- [R] Step 2 - Curriculum: modules (sections) each with ordered lessons
- [R] Step 3 - Requirements: what you will learn (bullet list), prerequisites, target audience, linked kit slugs
- [R] Step 4 - Pricing: free toggle OR price + optional discount (TZS)
- [O] Step 5 - SEO & certificate: meta title, meta description, enable certificate toggle, custom cert template upload
- [R] Step 6 - Review: submit for approval (status PENDING_REVIEW then admin publishes)

3. Lesson types (per lesson in curriculum)

Lessons auto-complete when learners finish content (video end, article scroll, quiz pass, assignment submit).

- [R] VIDEO - title*, video file or URL*, optional free preview flag
- [R] ARTICLE - title*, article body text* (plain text / markdown-style paragraphs)
- [R] QUIZ - title*, questions with 2+ options each, correct answer marked, pass mark % (default 70), optional time limit
- [R] ASSIGNMENT - title*, instructions*, optional rubric, max score, due date; students submit text, GitHub URL, and/or files
- [O] Mark at least one early lesson as free preview for catalog sampling

4. Learning kits (Admin > /admin/kits)

Physical/digital STEM kits sold or bundled with courses. Publish when inventory & content are ready.

- [R] Core: title*, subtitle, description, category (Robotics/Electronics/IoT/Coding/STEM), difficulty, age range
- [R] Commerce: price (TZS) or free, inventory count, status (Draft/Published/Archived)
- [R] Thumbnail + gallery images (captions, one marked primary)
- [R] Components list - name, quantity, description, optional component photo per item
- [R] Materials - title, type (Guide/Video/PDF/Worksheet/Project), description, URL, duration
- [O] Learning outcomes & project ideas (bullet lists), related course slugs for cross-linking

5. Programs & bootcamps (Admin > /admin/programs)

Cohort-based offerings with seats and registration windows.

- [R] Title*, type (e.g. Bootcamp, Accelerator), description
- [R] Thumbnail - 16:10, min 800x500 px
- [R] Schedule: start date, end date, format (Online/In person/Hybrid)
- [R] Capacity: seats, price (TZS), status (Draft/Open/Full/Closed/Archived)
- [O] Link program marketing copy to related courses & kits on the home page

6. Competitions (Admin > /admin/competitions)

STEM competitions and fairs with registration and prize info.

- [R] Title*, description, thumbnail
- [R] Dates: start & end; status (Upcoming/Registration open/In progress/Completed)
- [O] Prize description (cash, kits, mentorship, etc.)
- [O] Optional team name on learner registration

7. Organizations (Admin > /admin/organizations)

Universities, hubs, schools with org portal for members and kit logistics.

- [R] Name*, URL slug*, type (University/Hub/School/Other)
- [O] Logo URL, verified badge (admin)
- [O] Member invites - email, role (Admin/Instructor/Member)
- [O] Org kit inventory - quantity on hand, reorder level; kit procurement requests with quantity & notes

8. Community & discussions

Channels under /dashboard/community. Course-specific threads on course detail pages.

- [R] Discussion post: title*, body*, channel (e.g. general), optional cover image
- [O] Excerpt auto-generated from body; pin/resolve flags for moderators
- [O] Replies with accepted-answer support for Q&A threads
- [O] Seed channels: General, Projects, Competitions, Help - with welcome pinned posts

9. Learner projects showcase (/dashboard/projects/new)

Student-built prototypes and MVPs displayed publicly when published.

- [R] Title*, description*, category*, status (Idea/Prototype/MVP/Launched)
- [O] Thumbnail, tags, GitHub URL, demo URL
- [O] Curate featured projects for /projects catalog

10. IoT solutions workspace (Admin > Content > Solutions)

Guided lab experiences with steps, components, and code templates.

- [R] Title*, subtitle, description*, difficulty level, estimated hours
- [R] Components list (JSON), related kit slugs
- [R] Lab steps (ordered instructions), optional code template
- [O] Status: Draft/Published/Archived

11. Lab resources (/lab-resources, Admin > Content)

Reference library for components, sensors, boards, tools, and guides.

- [R] Title*, type (Component/Sensor/Board/Tool/Guide/Other), description
- [O] Category, thumbnail, file upload URL, external reference URL
- [O] Bookmarkable by learners in dashboard resources

12. Blog & marketing content (Admin > Content)

News, tutorials, and platform updates on /blog.

- [R] Title*, slug, excerpt, body*, category*
- [O] Author assignment, published date, status (Draft/Published/Archived)
- [O] Cover imagery aligned with home page editorial style

13. Pricing plans (Admin > Content > Pricing)

Marketing tiers on /pricing (not subscription billing).

- [R] Plan name*, slug*, price (TZS), billing period (month/year)
- [R] Features list (bullets), CTA label & link
- [O] Popular badge, sort order, active toggle

14. User profiles & onboarding

First-run experience and public profile pages at /profile/[username].

- [O] Profile: full name, username, avatar, bio, location, website, LinkedIn, GitHub
- [O] Privacy toggles: public profile, show courses, show certificates
- [O] Onboarding flow copy & illustration assets for new students
- [O] Role-specific defaults: Student, Instructor, Org admin

15. Admin publishing checklist

Before go-live, verify each catalog item meets quality bar.

- [R] Course: pending review queue cleared, preview tested on mobile, all lesson media loads
- [R] Kit: components match physical BOM, inventory accurate, gallery shows product clearly
- [R] Program/competition: dates correct, thumbnail on home discover sections
- [R] SEO fields filled for top catalog courses; metaTitle/metaDesc under 60/160 chars
- [O] Email notifications (GMAIL_USER + app password in .env) for invites & receipts
- [O] Run npm run content:assets for placeholder catalog images if seeding dev data
